Sale Terms and Conditions

All cattle sell guaranteed under the Terms and Conditions of the American Angus Association and are guaranteed by the individual consignor. All cattle must be paid for on sale day, prior to their release, unless previous arrangements have been made.

Transportation

After payment arrangements, cattle may be transported or arranged to be left at F&T Livestock for future pick up. Transportation intentions will be verified at settlement and noted on load out papers.

Update Information

A supplement sheet will be available sale day with updated information. This sheet and any announcements made from the auction block will take precedence over the sale book.

Herd Health

Health certificates, issued by a licensed veterinarian within 30 days, will accompany all cattle for immediate shipment.

Breeding Age Bulls

Breeding age bulls will have a minimum scrotal circumference of 32 cm and will have passed a breeding soundness evaluation (BSE) performed by a licensed veterinarian within 60 days of the sale date. Bulls will be in compliance with the Missouri State regulations regarding a negative Trichomoniasis status.

Genetic Conditions/EPDs

Current genetic condition status and EPDs are listed and current as of February 12, 2021. Updated information can be viewed on line at <http://www.angus.org>.

Inspection of Cattle

The cattle will be available for viewing on Saturday, March 20th at 2 p.m. at the sale site.

Greetings from the Heartland!

Although it certainly feels like somewhere much further north at this time, as we experience some record setting lows and extremely cold wind chills. Wow, and we thought 2020 was unique – certainly, 2021 is off to an interesting start...

That said, you all know that despite “everything else” going on, the cows will still need bred for next season’s calf crop (be sure to check out the solid bull offering – they’re all tested & ready to go); the grass will grow and you need cows to convert it into pounds of beef – adding new genetics or pairs is a nice way to freshen up or diversify your gene pool (you’ll find several A.I. sired animals or bred cows waiting for warmer weather to calve with outcross genetics); and the county “shows must go on” with some halter broke young heifers – as we all are looking forward to a least a little bit warmer weather!

If you are still reading this note (I have often wondered how many do), I hope you noticed that we are also offering online viewing and bidding (see section on inside cover for information). Please note that you will need to register and set up an account to do this. Several animals will likely be at F&T on Friday afternoon if you would like to view some in person; this is not required, so some will not come until Saturday afternoon.

As always, a special thanks to our advertisers for their support! I look forward to seeing you on sale day and, as always, feel free to contact me concerning the sale.

CAB Seedstock sire with a +1.05 marb EPD. Another excellent bull from a dam we have retained every female & sold every bull. Dam's solid production record of 8@366 day CI, 6@108 BW (72 lb avg), 6@105 WW, 6@104 YW, 3@132 Marb, 3@ 106 RE takes out all of the guess work. Had we not used a maternal brother as a herd sire (sire of Lot 1), we would have kept him to use ourselves.
